

# Budget-Friendly Vacuum Banknote Counting Machine CCE M-2008

With over 20 years of experience in the production and development of vacuum counter technology, the CCE M-2008 is introduced to ensure accurate and efficient banknote processing with its swift yet steady counting.

Even more, this budget-friendly machine helps improve productivity while keeping the operational cost low.

## What makes this product different?

### Excellent Accuracy

The combination of aviation-grade precession spindle, high quality electronic components, and years of optimized software systems provide highly accurate counting capabilities for banknotes in different fitness level (FIT/UNFIT).

### Outstanding Industrial Design

Aside from being fully resistant on dust and liquid, the enclosure also allows heat dissipation on the back of the machine to support heavy-duty banknotes processing.

### Informative LED Screen

The large and bright LED screen ensures better visibility of processing result.

### Built for Comfort

The high quality motor and low-noise vacuum pumps create a more comfortable working environment.

# How This Product Benefits Me

## Valuable Investment

with its well-known reliability and cost-effectiveness

## Improved Staff Performance and Productivity

with its high speed and accuracy in counting banknotes

## Improved Customer Service

with lower rate of miscounting, customer will feel satisfied and comfortable with the service
